Education

University of Oklahoma — Norman, OK
Bachelor of Science in Computer Science – Overall GPA: 3.63 — *Expected May 2027*

- Relevant Coursework: Data Structures, Discrete Structures, Software Engineering, Intro to Operating Systems, Artificial Intelligence

Broward College - International Center — Ho Chi Minh City, Vietnam
Associate of Science in Software Development — *October 2021 – July 2023*

Technical Skills

Languages: Java, Python, C#, C++, SQL, JavaScript, HTML, CSS
Developer tools: Git, VS Code, IntelliJ, CLion, Docker
Database: MariaDB, PostgreSQL

Relevant Experience

Undergraduate Research Assistant — Norman, OK
Student Research Assistant — *January 2026 – Present*

- Collecting survey responses (16 to date) from open-source maintainers and contributors on AI-assisted contributions, in collaboration with a faculty advisor.
- Developing methods to present survey findings and preparing follow-up interviews with participants for deeper qualitative insights.
- Collaborating with a fellow student researcher, who manages the paper's references, to support the research paper.
- Conducted a literature review of 5+ academic sources and case studies on AI's impact on open-source software and its communities.

OU Food Services - Wagner Dining Hall — Norman, OK
Student Assistant — *January 2025 – Present*

- Kept service fast and accurate during peak shifts with 200+ guests.
- Maintained clean, organized work areas in line with food safety and health standards.
- Coordinated with team members to cover shifts and keep operations running.

Airport Transport - Global Engagement — Norman, OK
Student Worker — *Seasonal: Spring 2025, Fall 2025, Fall 2026*

- Welcomed incoming international students, serving as their first point of contact.
- Directed students to shuttles to ensure arrivals to campus smoothly.
- Adjusted to flight delays and schedule changes while keeping the office informed.
- Answered questions and addressed concerns from students, families, and the public.

Projects

Personal Portfolio & Blog | *Cloudflare Workers, Next.js, Tailwind, MDX* — October 2026

- Built a static content pipeline with MDX to render dynamic blog posts with custom React components.
- Designed a responsive, accessible interface for project showcases and articles.
- Deployed to Cloudflare edge network, achieving 100 desktop and 96 mobile PageSpeed performance scores.

Pocket Penguin | *Flutter, Dart, Django, Docker* — August – December 2025

- Set up CI/CD with GitHub Actions and worked in Agile sprints to deliver as a team.
- Built a gamified habit tracker where completed tasks earn coins for virtual penguin avatar cosmetics, as a team project.
- Implemented the wardrobe system in Flutter, including the menu, live penguin display, and selectable backgrounds and items.
- Redesigned tab navigation with new icons and integrated a teammate's artwork.

DeepAnalyze - Capstone Design Project | *Next.js, Docker, FastAPI* — August – Present 2026

- Developing multi-user collaboration features for a no-code platform that turns social media data into research-ready datasets, as part of a team capstone.
- Meeting bi-weekly with faculty mentor acting as client to review progress, clarify requirements, and plan next steps.
- Coordinating with a second team to integrate their backend components with our multi-user application features.
